

Project Executable Files

Date	30 June 2026
Team ID	XXXXXX
Project Name	Smart Lender
Maximum Marks	3 Marks

Project Executable Files:

This section contains all the executable and deployable files required for the Smart Lender project. The project has been organized with all necessary source code, machine learning model files, HTML templates, and supporting resources. The submitted files enable the evaluator to set up, run, and test the application successfully by following the provided instructions. All required dependencies and project files have been included to ensure smooth execution and evaluation of the Smart Lender loan prediction system.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code	Yes
2	README / Setup Guide	Yes
3	requirements.txt	Yes
4	Database files	NA
5	Environment configuration (.env.example)	Yes
6	Deployed Application URL	Yes
7	Executable/Application	Yes
8	Docker Configuration	NA

9	Test Files	Yes
10	Demo Video	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
Smart_Lender/
|
|  └─ app.py
|  └─ best_model.pkl
|  └─ scaler.pkl
|  └─ requirements.txt
|  └─ README.md
|
|  └─ templates/
|    |  └─ home.html
|    |  └─ input.html
|    |  └─ output.html
|
|  └─ static/
|    |  └─ css/
|    |  └─ images/
|
|  └─ dataset/
|    |  └─ loan_data.csv
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	
Login Credentials (Demo)	[Provide demo username and password for evaluator access]
Platform / Hosting Provider	[e.g., Render, Vercel, AWS, Heroku, Azure]
Repository Link	https://github.com/shabeenashaik0506-droid/Smart-Lenders-Project
Demo Video Link	https://drive.google.com/file/d/1Z1XVCSwT1HP-RkTLHQa7J-xQC-En42VR/view?usp=drivesdk

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

- 📄 Download the project files.
- 📄 Install Python 3.10+.
- 📄 Install dependencies:

```
pip install -r requirements.txt
```
- 📄 Place **best_model.pkl** and **scaler.pkl** in the project folder.
- 📄 Run:

```
python app.py
```
- 📄 Open:

```
http://127.0.0.1:5000
```
- 📄 Enter applicant details.
- 📄 Click **Predict**.
- 📄 View **Loan Approved** or **Loan Rejected**.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction depends on dataset quality	Improve dataset
2	Supports limited input features	Future enhancement
3	Local deployment only	Can be deployed on Render/Heroku
