

Demonstration of Proposed Features

Date	1 July 2026
Team ID	XXXXXX
Project Name	Smart Lender
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document presents the proposed features of the **Smart Lender – Loan Approval Prediction System** and records their implementation and demonstration status. It serves as evidence that the developed application successfully performs loan eligibility prediction using a machine learning model, processes user input through a Flask web interface, and delivers accurate approval or rejection results based on the provided applicant details.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User Registration	Allows users to access the Smart Lender application.	Implemented	Yes	Working Successfully
2	Loan Application Form	Users enter applicant and loan details for prediction.	Implemented	Yes	Fully Functional
3	Data Preprocessing	Input data is scaled using the trained scaler before prediction.	Implemented	Yes	Tested Successfully
4	Loan Prediction Model	Machine learning model predicts loan approval or rejection.	Implemented	Yes	Accurate Results
5	Prediction Result	Displays "Loan Approved" or "Loan Rejected" to the user.	Implemented	Yes	Output Verified
6	Flask Web Interface	Provides an interactive web application for users.	Implemented	Yes	Successfully Deployed

Feature Implementation Summary:

Total Features Proposed	6
--------------------------------	---

Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
