

## Project Demo Planning

|                      |              |
|----------------------|--------------|
| <b>Date</b>          | 1 July 2026  |
| <b>Team ID</b>       | XXXXXX       |
| <b>Project Name</b>  | Smart Lender |
| <b>Maximum Marks</b> | 1 Mark       |

### Project Demo Planning:

A well-structured demo plan ensures that the team presents the Smart Lender project effectively by demonstrating all major functionalities of the web application. The demonstration covers the problem statement, machine learning model, user interface, loan prediction process, and project deployment. Each team member is assigned specific responsibilities to ensure a smooth presentation.

| S.No | Demo Section          | Description                                                                                             | Duration (mins) | Responsible Member |
|------|-----------------------|---------------------------------------------------------------------------------------------------------|-----------------|--------------------|
| 1    | Introduction          | Introduce the Smart Lender project, objectives, and team members.                                       | 2               | Team leader        |
| 2    | Problem Statement     | Explain challenges in manual loan approval and need for prediction.                                     | 2               | Member 1           |
| 3    | Solution Overview     | Describe Flask application, Machine Learning model, dataset, scaler, and prediction workflow.           | 3               | Member 2           |
| 4    | Live Demonstration    | Demonstrate entering applicant details, model prediction, and displaying Loan Approved/Rejected result. | 5               | Member 3           |
| 5    | Technical Explanation | Explain Flask routes, HTML templates, Pickle model loading, preprocessing, and prediction logic.        | 3               | Member 4           |
| 6    | Questions & Answers   | Respond to evaluator questions and conclude the presentation.                                           | 2               | All Member         |

### Demo Flow Summary:

| Step | Activity | Notes |
|------|----------|-------|
|------|----------|-------|

|   |                                  |                                                                                        |
|---|----------------------------------|----------------------------------------------------------------------------------------|
| 1 | Introduction & Problem Statement | Explain the purpose of Smart Lender and project objectives.                            |
| 2 | Solution Overview                | Present ML model architecture, Flask application, and prediction workflow.             |
| 3 | Live Feature Demonstration       | Show loan application input, prediction, and output page.                              |
| 4 | Q&A Session                      | Clarify evaluator questions and conclude the demo.                                     |
| 5 | Technical Code Explanation       | Explain the provided Flask code, model loading, preprocessing, and prediction process. |
